1 Introduction

SDR Control Room is a graphical user interface to control and monitor Core Frameworks. It can be used as an alternative to the tools provided by SCARI-Open such as Component Inspector and Application Manager. This tool is not a deliverable as defined by the SDRF Waveform Reference Implementation contract. It is provided on an “*as-is*” basis, for the convenience of the users.

2 Setup

Please use the following settings to connect to SCARI-Open Core Framework:

In the Setup menu, choose “Add Domain Manager from Naming Service”.

Naming Service: corbaloc::COMPUTER_NAME:1050/NameService (replace COMPUTER_NAME with the name of your computer)

Domain Name: SCARI_DM

Manager Name: DomainManager

3 Using SDR Control Room

Please refer to the SDR Control Room user manual.
