# Sharing - Experiences and Initiatives

Alexander Kühn, Head of International and National Spectrummanagement

Wireless Innovation Forum

Webinar, 27.06.2024

[www.bundesnetzagentur.de](http://www.bundesnetzagentur.de)

- Allotment plan allows different use w/o interference
- Traditional: PMSE (SAB/SAP)
- Studies on more efficient use with Military and PPDR

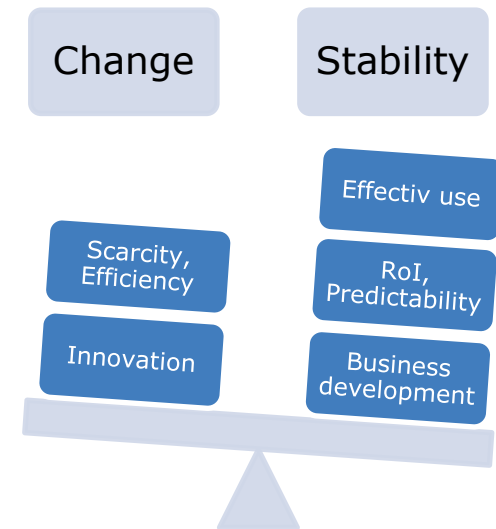

- Low and Medium Power limit
- Additional to 3700 -3800 MHz for privat networks / local networks
- Sharing with Satellite is a requirement
- Study-Initiative towards automated assignments

- WRC-23 decision allows IMT and WiFi Technology
- Clear usage conditions needed
- CEPT work with mandate of the EC on harmonised usage conditions in a shared approach.

- Spectrum is (still) scarce resource
- **High dynamic** of the development of communication technologies requires **constant adjustment**.
- Spectrum users demand **stability, certainty and predictability**.
- **Efficient use of spectrum !**
