

Wireless Innovation Forum Welcomes Three New Members

Telecast Technology, Larsen & Toubro, DGA Join in 2014

For Immediate Release

WASHINGTON, DC, 26 September 2014 – The Wireless Innovation Forum™ (www.WirelessInnovation.org), a non-profit international industry association dedicated to driving the future of radio communications and systems worldwide, today announced the addition of three new international member organizations. New members include:

Telecast Technology (<http://telecast.en.china.cn/>) is a specialized manufacturer of CATV products in China with a comprehensive understanding of the CATV industry, especially in terms of Topology, Technology Scheme Design and Operation Modes.

Larsen & Toubro (L&T) (<http://www.larsentoubro.com>) is a technology-driven USD 14.3 billion company that infuses engineering with imagination, offering a wide range of advanced solutions, services and products.

The French Armaments Procurement Agency (DGA) (<http://www.defense.gouv.fr/dga>) is jointly responsible with the Defence Staff (EMA) for equipping the armed forces, conducts the armament programmes whose purpose is to provide the armed forces with the weapon systems that are essential for the fulfilment of their missions.

“The members of the Forum are excited to begin working with these new organizations who come from three separate countries and represent three independent vertical markets,” said Lee Pucker, CEO of the Forum. “Such diversity is critical in promoting our mission of advocating for the innovative use of spectrum and advancing technologies such as software defined radio, cognitive radio and dynamic spectrum access that support essential or critical communications worldwide.”

About the Wireless Innovation Forum

Established in 1996, The Wireless Innovation Forum (SDR Forum Version 2.0) is a non-profit mutual benefit corporation dedicated to advocating for spectrum innovation, and advancing radio technologies that support essential or critical communications worldwide. Members bring a broad base of experience in Software Defined Radio (SDR), Cognitive Radio (CR) and Dynamic Spectrum Access (DSA) technologies in diverse markets and at all levels of the wireless value chain to address emerging wireless communications requirements.
