

Software-Defined-Radios Programs and Products

WinnF 2021 - Italy Programs Update

—

November 30th , 2021

Summary

- > SDR Programs
 - SDR EVO
 - ESSOR EDIDP - European Programs

- > Related Leonardo SDR Products
 - Land Products
 - Naval Products
 - Airborne Products

Programs and Products Status

ELECTRONICS DIVISION

Programs

National

- “SDR Nazionale” (ground)
- “Legge Navale”
- “SDR Nazionale” (airborne)
- “SDR Evo”

International

- European Secure Software Defined Radio (ESSOR OC1)
- European Defence Industrial Development Programme (EDIDP)

Related Swave[®] SDR Products

Swave[®] SDR Vehicular

Swave[®] SDR Naval

Swave[®] SDR Airborne

Airborne SDR V/UHF Radio (SRT-800)

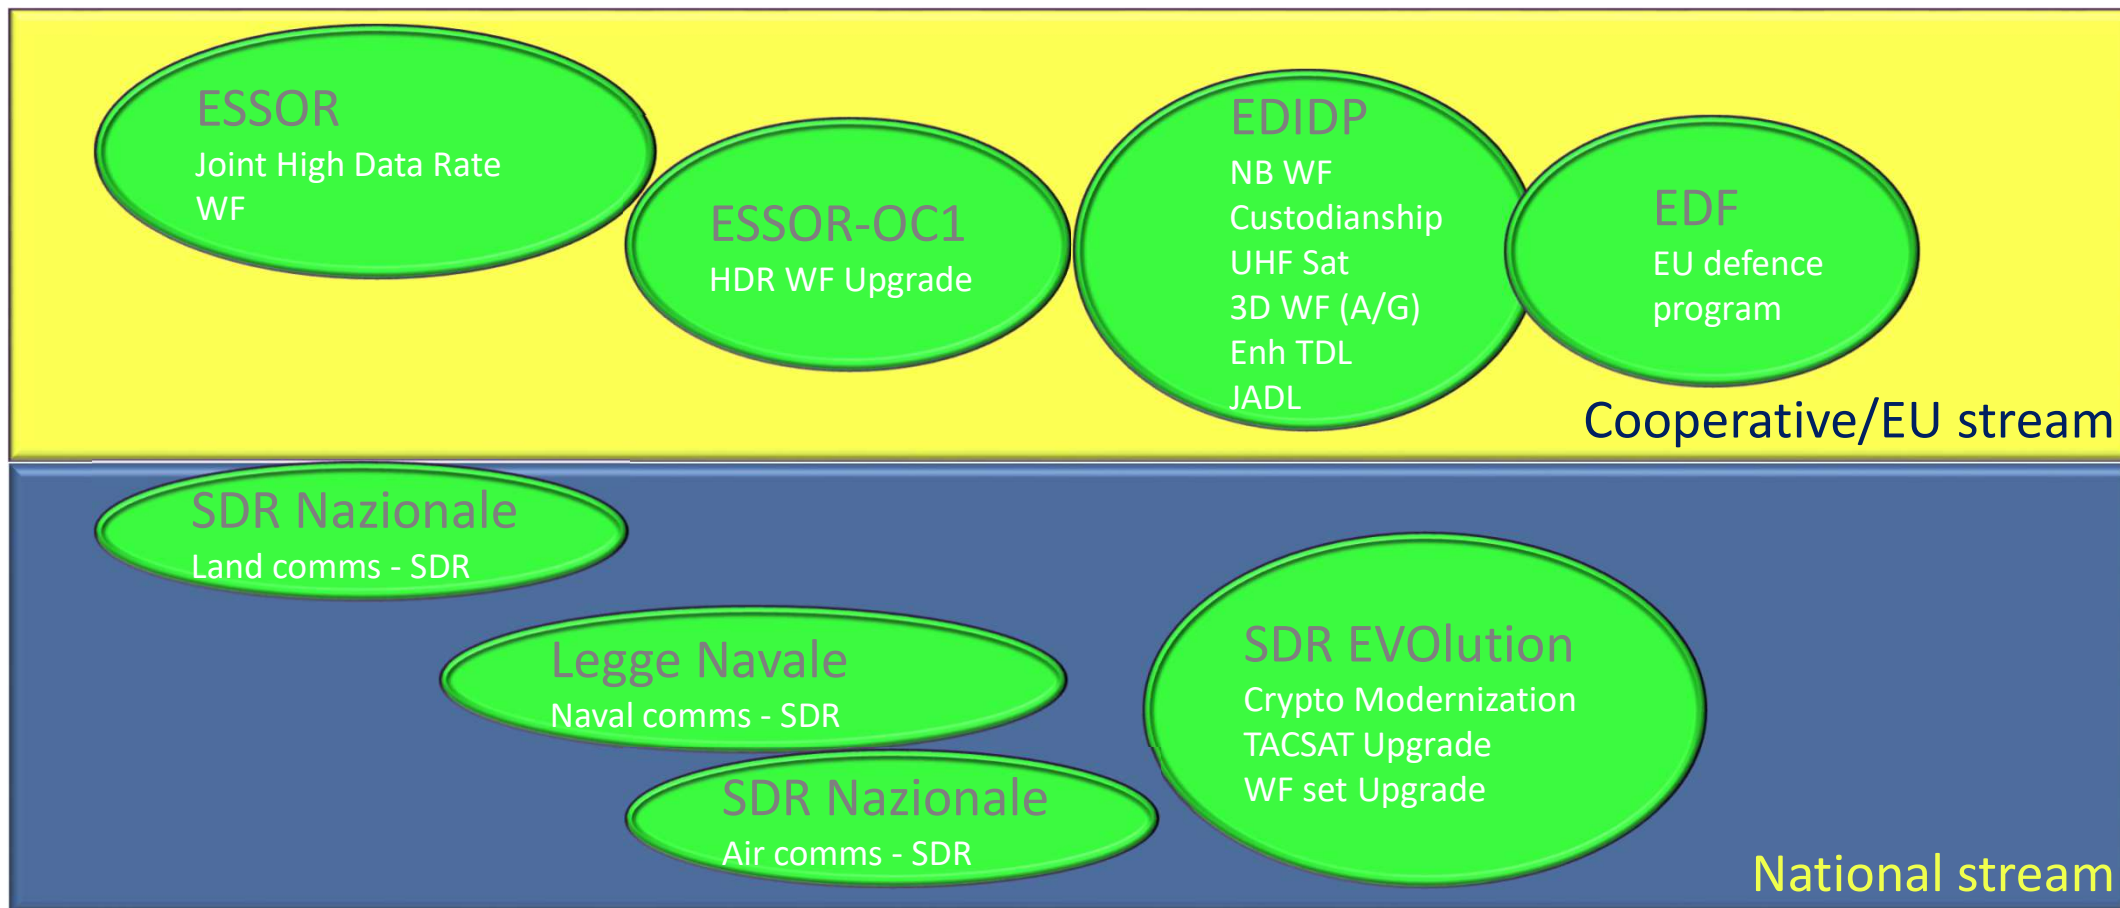

The Airborne Swave Radio completes the Leonardo SDR product portfolio, covering any application in all operational scenarios.

SDR Programs

Italian SDR Programs - Roadmap

SDR EVO Program – Highlights

Italian program for the evolution of the current communications capabilities

- Algorithms update for NATO joint operations
- TACSAT capability upgrade
- New waveforms addition
- National assets upgrade (Land, Naval, Air)

EDIDP-ESSOR Program

- Objective

to support the development of an interoperable secure defence communications system compliant with ESSOR and SCA software defined radio products.

- EDIDP / EDF framework

EDIDP Programme “Interoperable communication activities for waveforms at tactical level compliant with European Secure Software defined Radio (ESSOR) and Software Communication Architecture (SCA) software defined radio platforms (direct Award – 2019)”

- Main INFO

- 6 Strands
- 2 Baskets
- 3 Consortiums
- 8 Participating Nations

Consortiums

Ground Basket

Air Basket

Beneficiaries Consortium

EDIDP-ESSOR Strands

- ESSOR Strands (Ground Basket)

- **NBWF** (Narrow Band Waveform)
- **Custodianship** (ESSOR products management)
- **UHF Satcom** (UHF over satellite Waveform)
- **3D** (A/G Waveform)

- Main Requirements/Objectives

- *ESSOR Custodianship Center* (to manage ESSOR standard products)
- *ESSOR Narrow Band Waveform* (a military, secure, tactical, Narrow Band Waveform for land coalition operations)
- *ESSOR 3D Waveform* (a military, secure, UHF 3D waveform for Air and ground coalition operations)
- *ESSOR UHF SATCOM* (a military, secure UHF SATCOM waveform for BLOS communications)

- ESSOR Strands (Air Basket)

- **Enhanced TDL**
- **JDAL** (Joint Advanced Data Links)

- Main Requirements/Objectives

- *ESSOR TDL* new generation of European Tactical Data Link terminals compatible with the ESSOR and SCA standards
- *ESSOR JDAL*, European IFDL, Definition and development high data rate waveform between high speed moving aircraft.

Leonardo Involvement:

- Coordinator of the Negotiation and Contract acquisition phase
- Responsible for the Beneficiaries Consortium
- Technical Leader of 3 strands

Leonardo related SDR Products

SWave® 4 Channels Vehicular Radio (VQ1)

- Spectrum Flexibility exploitation, 3-2000 MHz
- Four channels: fully simultaneous
- 50 W PeP transmit power
- Software reprogrammable (SCA/ESSOR)
- Security: Type 1
- Scalable: 2/3/4 channels
- Waveforms:
 - New generations Networked: ESSOR HDR, SBW, NBAW
 - BLOS: HF Suite, TACSAT
 - Ground to Air: HAVEQUICK I/II, SATURN
 - Legacy Interoperability: SINCGARS, VLOS, 188-220 (STANAG 4204/5), HFVB (contiguous + ALE4G)

Centauro

VBM

VTMM

VTLM2

Command Posts

- Designed for Naval/Fixed application
- Common Core for HF and V/UHF band
- HF RF/PA Dedicated Module, including Amplifier and Pre-post Selector
- V/UHF RF/PA Dedicated Module, including Power Amplifier and Co-Siting Agile Filter

SDR HF RADIO :

- Frequency range : 1.5-30 MHz
- Embedded Output Power: 150 W
- Waveforms:
 - MIL STD 188 -141B (ALE2G)
 - STANAG 4285
 - STANAG 4538
 - HFWB (contiguous + ALE4G) on 2022
- 500W/1Kw Power Amplifier Stage

SDR VHF/UHF RADIO :

- Frequency range: 30-512 MHz
- Output Power: 100 W
- Waveforms:
 - VULOS AM/FM
 - STANAG 4204
 - STANAG 4205
 - HQ I/II (2022 with SATURN)
 - TACSAT IW (2024)

Common Core Module RF/PA Dedicated Module

SRT-800 SWave® Airborne SDR

LOS WAVEFORMS

- VLOS: AM/FM voice and data
- ATC in the 118-137 MHz band (8.33 kHz and 25 kHz channels) with embedded FM immunity i.a.w. ED-23C
- Link-11/Link-22 with external modem
- Sonobuoy
- Maritime in the 137-156 MHz band
- EPM: HaveQuick/HaveQuickII, SATURN, SINCGARS
- Selfnet® Soldier Broadband Waveform
- ESSOR's High Data Rate Waveform
- VMF i.a.w. MIL-STD-188-220D/MIL-2045-47001
- Capability to host indigenous SCA waveforms

COMSEC

- Programmable Cryptographic module
- Compatible with external cryptos
- Capability to host indigenous algorithms

SATCOM

- Functionalities:
 - ✓ MIL-STD-188-181/182/183
 - ✓ Data: MIL-STD-188-184
- Preloaded frequencies for Italian SICRAL1/1B and U.S. satellites
- Capability to load indigenous frequencies
- External Power Amplifier and Low Noise Amplifier

SWAP

- Weight: < 4,1 Kg
- Size: 2 MCU
- Power consumption: Rx 70 W; Tx 160 W
